

## Dahua – Save footage from your CCTV using your PC

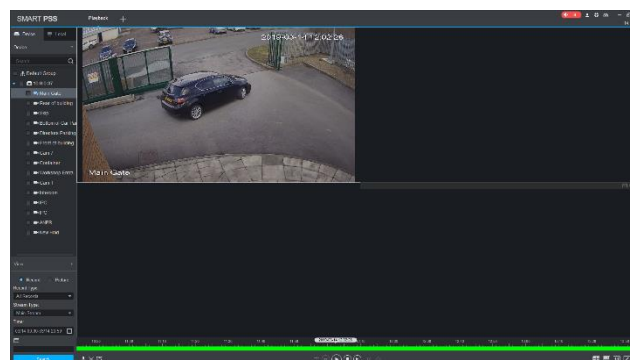

Open the Dahua software and type in your **Username** and **Password**. Click **OK**. On the Main Menu under the title Search, click the **Playback** button.

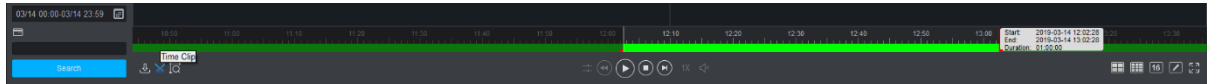

On the left-hand side, click the camera(s) and select the **Date** you wish to view. Press **Search**.

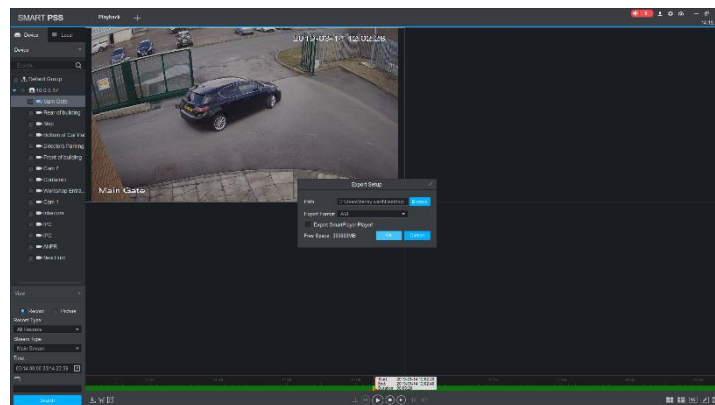

This will show a full day's worth of footage. Use the **scroll button** on your mouse to zoom hours into minutes, allowing you to select a clearer start time that you wish to view and export.

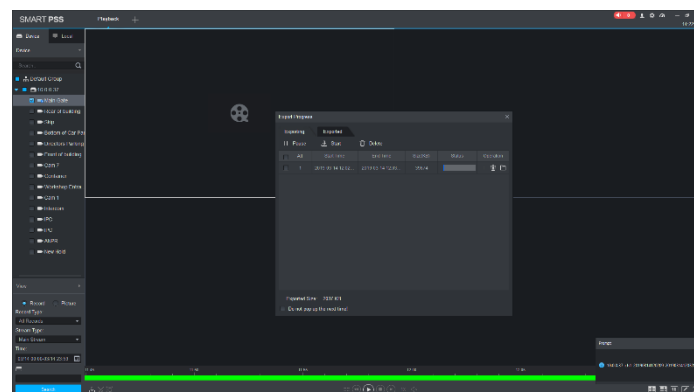

Click the **Scissors**, this will suggest an hour's worth of CCTV footage to download. Adjust this time by **dragging the red dots** to cover the footage you are wanting to export.

To export the selected footage, click the **scissors** again. This will open up a pop-up menu, click **Browse** and select the area you wish to put the recording i.e. USB drive. Change the format to **AVI** and click **OK**. Click **OK** to the prompt.

An Export Progress will now show. Once complete click the **cross** to close. You have now downloaded your selected footage. If you wish to download more, repeat the above steps or if finished, close the program altogether.

**IF YOU REQUIRE ANY FURTHER ASSISTANCE WITH EXPORTING FOOTAGE, PLEASE CALL OUR TECHNICAL SUPPORT TEAM ON 0113 281 2106, WHO WILL BE ABLE TO TALK YOU THROUGH HOW TO EXPORT FOOTAGE FROM YOUR CCTV RECORDER USING YOUR PC.**
