

Euro - Programming Key Fobs

To enter the Master Manager Menu, Press **D** and type in your **MASTER MANAGER CODE**, (this will be at least 4 digits long). Use the **NO** key until it scrolls to 'Change Codes' and press **YES**.

CHANGE CODES?

Press **YES** when the screen displays Change User Codes.

Change User
Codes?

Using the **D** key to scroll, find a free user number. Once found press **YES**.

USER NUMBER
[021]

The screen will display Enter User Code, if stars are present there is a fob or code already programmed in. Press **NO** to go back. If brackets are clear either enter a new code or present a tag until the brackets fill with asterisks. Press **YES**.

ENTER USER CODE
[****]

Press **YES** to User Type. Using the ABCD keys, deselect the areas you do not wish for the user to be able to set. Press **YES**.

User Areas
[A]

Allow the user to set and unset their areas. Using the **B & D** keys will change it so the user can only set their areas or unset. Press **YES**.

Flexi Set gives you the opportunity to choose the areas you want to set when setting the alarm. If you select **YES** this will give you the option to pick an area that you have been assigned, before you set the alarm. If you select **NO**, this will automatically set without prompting first. Press **B & D** to change this. Press **YES**.
